

Remarks

Claims 1-82, 84, 85, 87, 88, 91-99, and 103-129 have been canceled. Claims 83, 86, 89, 90, 100-102 remain after amendment. Claims 130-145 have been added.

The Examiner imposed a restriction requirement between groups I-V. Applicants elect Group IV (claim 89), without traverse. Claims 83, 86, 90, 100, 101, and 102 as amended and newly added claims 130-145 fall within the elected group IV. Thus, examination of claims 83, 86, 90, 100, 101, 102, and 130-145 is required.

The Examiner has additionally required an election of species between groups 1-7. Applicants elect the species directed to pyrimidines. Claims 83, 86, 89, 90, 100-102 and 130-145 read on the elected species.

The unifying concept in the remaining claims is that each is a pyrimidine nucleoside that has two non-hydrogen substituents in the 2'-position of the nucleoside, which represents the core of the invention. Applicants are not aware of any prior disclosure of the use of a pyrimidine nucleoside with a "2'-branched" carbon to treat these viruses.

Respectfully submitted,
